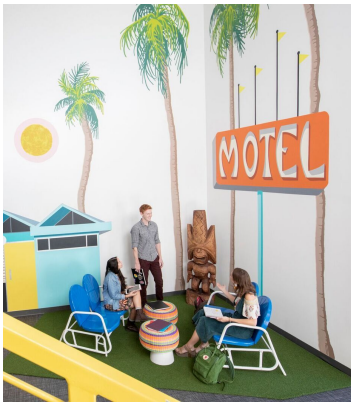
TECH 420 - Project 3 Proposal
Sarah Van Alstyne

Location - Forsyth Park

Box - Kids Lunch Box

Animation - Kid Playing Soccer

Rain Location - The Shed



My project is centered around an animated asset I found of a kid playing soccer. Following a theme of youth sports, I plan to include the asset in a kid's lunch box and film at Forsyth Park (where people often play soccer). If it is raining, I will film at The Shed instead. Inside the box there will be a miniature scene of a soccer field or backyard where the kid will be playing. I definitely plan to include a soccer net, grass, and maybe a hint of bleachers, but want to ensure that the scale feels accurate and the kid is not too small or large in the scene. I also plan to edit the texture maps of the animated asset.The biggest challenges will probably be the metal latch on the lunch box and the grass at the bottom of the box.

Interior - Soccer Field / Backyard
